

Online Test

We in partnership with Vidyarthi has introduced a new means of conducting online career assessment tests which has already created its mark at various schools.

This test caters to a scientific & interactive Assessment that helps identify and connect 4 key factors - Interest, Personality, Aptitude & Academic performance. We make sure that the student's calibre is not tested purely on his intellectual level. Our main aim to come up with this concept is to give students and parents an insight of this triangulation method which does not form results only on the basis of psychometric assessment perspective but it covers skills and academic performances as well.

The test is conducted for students of 8th to 12th grade and each level would have a different Aptitude Test. There are 4 major components which the students would benefit out this Career Assessment conducted.

- **Trait Collector** – This interactive & introspective tool, systematically helps map a student's Interests, Personality, Aptitude and Academic performance. This is the first step in discovering your career journey.
- **Career Library** - Career Library is a proprietary collection of e-Books that cover many Careers under different Industries. The Career Library seamlessly blends with the Trait Collector to show you 'relevant' e-Books that form part of your interests.
- **Career Connect** – This is a network with a purpose. It helps to reach out to your peers with similar Interests and exchange valuable information & perspectives on Careers one love. It helps to expand the network automatically.
- **One- On-One Counselling** - The one-on-one counselling is a carefully designed module in the Career Discovery Program. We see to it that the expertise and experience of our Career Counsellors are applied to the results from Trait Collector to help prepare a structured Career Plan for each of you.

A career counselling test does not merely cater to a student's general knowledge or their grasping power. Career assessment tests also takes into consideration the academic scores as it helps to strike a balance between what the students perceives himself as and what he actually is. We help them to identify their strong traits and recognize where their aptitude lies. As the entire process involves a lot of science and logic, our counsellors with their general approach adapt practicality to the process.

We have accumulated the best from all arenas which help a student choose the best career path for themselves. We over here make sure that we not only suggest careers for students but understand the nitty gritty of one's behaviour personally and academically
